ABOUT

I am a Computer Science student at Webster University with experience in Django and Django REST Framework, currently learning FastAPI while building backend projects for my portfolio using Python and PostgreSQL. I plan to expand into DevOps fundamentals, including deployment, Docker, Kubernetes, and caching systems. I am interested in building scalable, tech-driven products and continuously strengthening my backend development skills.

EDUCATION

Webster University in Tashkent

B.S. in Computer Science

Tashkent, Uzbekistan

Expected Graduation, May 2028

- o **GPA:** 3.63/4.00
- o **Relevant Courses:** Programming 1 & 2, Operating Systems, System analysis & design

Najot Talim, Chilonzor

Python Backend Development

Tashkent, Uzbekistan

July 2025 – Feb 2026

- o Studied Python for backend development and software fundamentals
- o Developed backend applications using Django and FastAPI
- o Built RESTful APIs and tested them using Postman
- o Documented APIs using Swagger (OpenAPI)
- o Worked with relational databases including PostgreSQL and SQLite
- o Used Git and GitHub for version control and collaboration
- o

PROJECTS

Online Store REST API [link](#)

Django REST Framework

Tashkent, Uzbekistan

Dec 2025 – Jan 2026

- Built a RESTful backend for an online store with role-based user access
- Implemented three user roles: Admin, Seller, and Buyer
- Enabled sellers to upload and manage products through API endpoints
- Designed APIs to allow users to browse products and complete purchases
- Tested endpoints using Postman and documented APIs with Swagger

Student Management System [link](#)

Django / Team Lead / Group Project

Tashkent, Uzbekistan

Nov 2025 – Jan 2026

- Developed a backend system for managing students and academic data using Django
- Designed the overall system architecture and implemented core backend components
- Implemented Head of Department (HOD) functionality with role-based access
- Coordinated a team, assigned tasks, and reviewed contributions
- Ensured integration of modules and consistency across the codebase

Personal Finance Tracker [link-Django](#), [link-DRF](#)

Django / DRF

Tashkent, Uzbekistan

Feb 2026 - Present

- Built a Personal Finance Tracker in two versions: Django web app (HTML/CSS) and DRF API backend.
- Implemented authentication, wallets/cards, and multi-currency support.
- Developed transaction tracking with categories and balance updates.
- Added budget limits with spending tracking and financial statistics.
- Created REST APIs with JWT authentication and Swagger documentation.

SKILLS

Programming:

- o **Languages:** Uzbek (native), English (Full professional proficiency), Russian (Limited working proficiency)
- o **Programming Languages:** Python, C++, HTML
- o **Frameworks & APIs:** Django, FastAPI, DRF, Django ORM,
- o **API Tools:** Postman, Swagger (OpenAPI)
- o **Databases:** PostgreSQL, SQLite, MySQL
- o **Tools & Platforms:** Git, GitHub, Basic project deployment, Linux, PyCharm, VS Code, Neovim
- o **Backend Concepts:** REST API design, Authentication & authorization, Role-based access control (RBAC), Database modeling & relationships.
